

SIDDHARTH CHATURVEDI

Bhopal, India | +91 9685533344 | siddharthchaturvedibittu29@gmail.com | LinkedIn | GitHub

PROFILE SUMMARY

Full-stack and AI/ML engineering student (B.Tech AIML, CGPA 8.37) who has built and shipped three end-to-end applications: a facial + voice biometric attendance system, an AI-powered resume screening tool, and a full-stack travel platform with an AI chatbot. Comfortable across Python and JavaScript/Node.js stacks, from model integration to database and auth design. Co-author of a published research paper on smart tourism technology.

TECHNICAL SKILLS

Languages: Python, JavaScript (Node.js), Java, SQL, HTML5, CSS3

Frontend: Streamlit, EJS, Bootstrap, React.js

Backend: FastAPI, Flask, Node.js, Express.js, REST APIs

Database & Auth: Supabase, PostgreSQL, MongoDB, Supabase Auth

AI / ML: Face Recognition, Dlib, Resemblyzer, Librosa, Hugging Face Hub, NLP, Google Gemini API

Data & Document Processing: NumPy, Pandas, pdfplumber, PyPDF2

Tools: Git, GitHub, VS Code

Core CS: OOP, DBMS, Computer Networks

PROJECTS

AI-Powered Attendance Management System

2025

Python, Streamlit, face_recognition, Dlib, Resemblyzer, Librosa, Supabase, PostgreSQL, Pandas

- Built an AI-powered attendance system combining facial recognition and voice biometrics to automate classroom attendance tracking.
- Implemented face-based attendance detection using face_recognition and Dlib to identify enrolled students from classroom photographs.
- Added sequential voice-verification using Resemblyzer and Librosa for a second biometric authentication layer.
- Built teacher and student dashboards in Streamlit for subject management, enrollment, and attendance records, with Supabase/PostgreSQL as the backend and Pandas-based attendance summaries.

AI Resume Screening System

2025

Python, FastAPI, Streamlit, Hugging Face Hub, Supabase, PostgreSQL

- Built an AI-based resume screening application with a FastAPI backend and Streamlit frontend, using Supabase/PostgreSQL for data storage.
- Implemented resume parsing and text extraction from PDF and DOCX files using pdfplumber, PyPDF2, and python-docx, including hyperlink extraction.
- Integrated pre-trained NLP models from Hugging Face Hub to analyze and score resumes against job descriptions.
- Added user authentication via Supabase Auth, supporting email/password login and Google OAuth.

Smart Travel & Tourism Platform

2025

JavaScript, Node.js, Express.js, MongoDB, EJS, Bootstrap, Google Gemini API, Leaflet.js | GitHub: add-your-repo-link-here

- Built a full-stack travel platform using Node.js, Express.js, and MongoDB, with EJS templating and Bootstrap for the frontend.
- Integrated the Google Gemini API to power an AI chatbot providing personalized travel recommendations.
- Added interactive maps with Leaflet.js and live weather data integration for destination browsing.
- Implemented PDF itinerary generation and REST APIs connecting the frontend and backend.

ACHIEVEMENTS

- Published Research Paper: "Development of a Smart Digital Platform to Promote Eco and Cultural Tourism in Jharkhand," International Research Journal of Engineering and Technology (IRJET) — add volume/issue/DOI or link if available.
- Patent Application (Filed): Contributed to an AI-based cloud security detection system, filed with the Government of India Patent Office — confirm exact status (filed/published/granted).

EDUCATION

Oriental Institute of Science & Technology, Bhopal

2023 – 2027

Bachelor of Technology (B.Tech), Artificial Intelligence & Machine Learning | CGPA: 8.37

Class XII (CBSE), Swami Vivekanand Public School, Satna — 79.8%, 2023
